

ALUMINIUM ENTRANCE DOORS

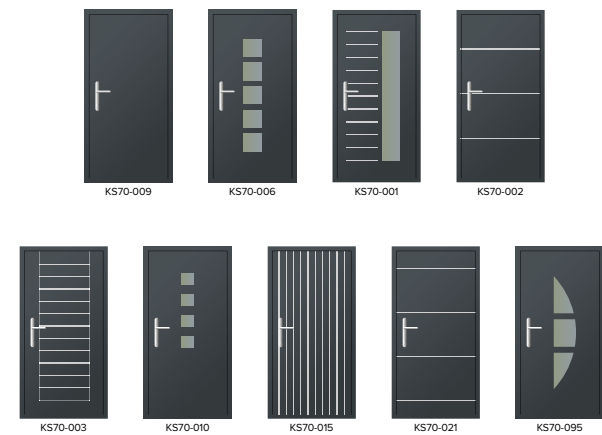

Your entrance door says more about you and your home than anything else. The new beautifully designed KAT range of aluminium entrance doors makes a real statement by providing you with the aspirational style of contemporary aluminium.

These sleek, strong doors complement other KAT products to provide a completely unified look.

Thermally efficient, high security, distinctive and virtually maintenance free, our aluminium entrance doors can be manufactured within a mere two weeks.

Including the option of double-glazed side panels and top lights.

There are nine door styles, all available in our elegant best selling Anthracite Grey.

While, to meet the contemporary demand for more generous proportions, all styles can be made up to a maximum of 996 x 2216mm.

Larger sizes can be accommodated through the use of optional side lights, top lights, add-ons, couplers and cills.

With the entire range covered by the reassurance of a full 10-year guarantee.

All designed to make a lasting impression on your visitors.

And on you.

- Glazed top lights with clear or satin obscured glass.

Material information

Aluminium doors and windows have re-gained in popularity since the turn of the 21st century and aluminium is now the optimum material for manufacturing doors and windows.

It is widely specified by architects for most serious new build and refurbishment projects. Aluminium doors require very little maintenance, just a wipe with a damp cloth when needed and a regular check to ensure they are kept free from grit and small stones. Aluminium is more resistant to the elements than uPVC and is not likely to warp or rot.

Accessories

KAT door handles are luxury products, made exclusively to a KAT design and guaranteed for 10 years. We offer a choice of four colour finishes so you won't be stuck for choice.

Check out the finishes on our handles because it is attention to detail that helps make this unique product range so exciting.

Safety & security

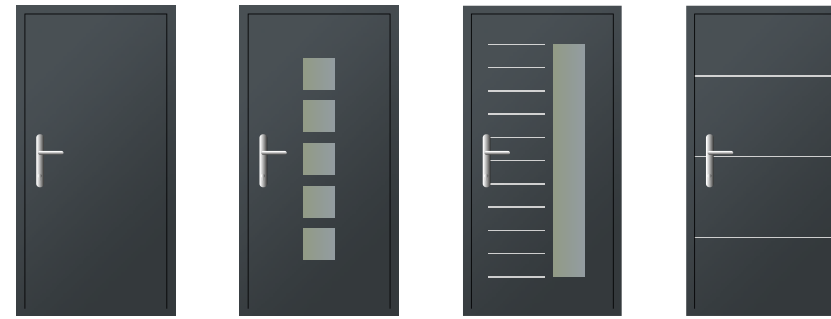

KAT Aluminium Entrance Doors are fitted with a Winkhaus 4 point Cobra lock and a 3 star diamond rated security cylinder with Kitemark, to keep your home secure.

The door system is 70mm front to back and the door slab itself is reinforced with glue laminated composite material, thermal insulation and finished with extremely robust aluminium skin throughout.
