Aluminium Inline Sliding Patio Doors

KAT has been manufacturing sliding patio doors for 20 years and we are recognised as the No. 1 supplier in the UK and Ireland. We are proud to offer the widest range of patio doors available anywhere. Our comprehensive Aluminium range includes 4 sliding designs: Inline, Lift & Slide, Super-Sized Lift & Slide and the Super-Slim Sliding Door. Each of our sliding patio doors are available in a wide range of RAL colours, including Marine Grade paint finishes for properties within 1km of the sea or in a saltwater environment.

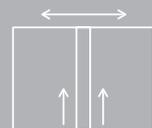

Aluminium Lift & Slide Patio Doors

With brushed steel handles as standard, our Lift & Slide patio doors allow natural light into the room space, with slim frame sightlines and panel widths of up to 3m high x 2.5m wide. The sliding panel door operates within its own twin or triple track so no additional space is required outside or inside your home. Simply turn the handle through 180° to raise the door on its track slightly and allow the doors to move smoothly on their stainless steel wheels and tracks.

Aluminium Folding Sliding Bifold Doors

Whatever the style of your home and the size of your living space, our bifold doors offer you the flexibility to create a home to suit the needs of your family. They are perfect for opening up your living space to make more of your garden in the summer months. When it's cooler outside, rest assured that KAT's bifold doors have industry leading weather ratings, which means you can enjoy your view and the natural light your doors allow into your home, whilst your energy bills remain low.

Aluminium Art Deco Doors

Upgrading traditional doors and windows which have been in-situ for many years is a sensitive task. KAT's Aluminium Art Deco Doors are the ideal solution for heritage applications such as a listed building renovation, retaining the slim lines of a buildings' original steel doors with all the benefits of modern energy ratings, the strength of aluminium and high security.

Choose from a single door or French doors, with vertical and horizontal bars, slim 59mm sight lines and a Lever/Lever door handle to closely replicate Art Deco designs, whilst keeping your home warm and secure.

Aluminium Entrance Doors

This beautifully crafted range of aluminium entrance doors make a real statement, combining aspirational, contemporary styling with PAS24 enhanced security. Thermally efficient, high security, distinctive and virtually maintenance free, our aluminium entrance doors can incorporate double-glazed side panels and top lights. There are hundreds of door styles, all available in a wide range of RAL colours in a matt or luxurious textura finish. The entire range is covered by the assurance of a full 10-year guarantee.

Aluminium Single & Double Doors

Double French Doors are often chosen because they are stylish, elegant and practical, designed to allow daylight to flood into your home. They are called French Doors because they originated in France, designed as windows you can open and walk through like a door. French Doors should only be installed as occasional doors, they should not be specified as front or main entrance doors.

For tall, slim openings for example in a bedroom, inward opening French Doors are ideal as they will create a wide opening - which matches up perfectly with a KAT glass Juliette balcony.

Aluminium Casement Windows

Whether your home is modern or traditional, we can offer a window solution to match your precise requirements. We have rounded frames, square frames and bespoke shaped frames. Today's aluminium windows are the ultimate 'must have' in home improvement circles and are increasingly specified for homes across the UK and Ireland, for new build or refurbishment. The very basic silver windows of the 1970's have been supplanted by slim, thermally efficient frames, combining today's technology with amazing surface finishes, to include texture and anodised.

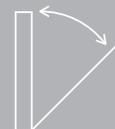

Aluminium Tilt & Turn Windows

Aluminium Tilt & Turn Windows are ideal for high-rise properties, where great ventilation and safe, easy cleaning from inside is essential. They are designed with a clever hidden sash, meaning that there is no sash visible from outside your home, ensuring a contemporary minimalist look. Our windows meet or exceed current standards demanded by the leading Test Institutes for weather performance and high security. The powder coating and anodised finishes used on our windows are guaranteed for 10 years.

Aluminium Art Deco Windows

Our Aluminium Art Deco Windows are manufactured from materials with the thermal properties and performance of a modern system. They are the ideal solution for heritage applications such as listed building renovations, retaining the slim lines of original steel windows.

Arch-headed windows are often specified to maintain a building's traditional aesthetics, with window handles in a choice of 3 designs; traditional Art Deco, Monkey Tail or Bulb End in a wide range of colours and finishes.

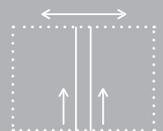

'Svarre' Glass-to-Glass Frameless Sliding Doors are stunning!

When the doors are closed, all that you can see from outside is a seamless glass surface with a beautiful coloured border which is baked into the glass and will never fade. As the doors slide open, one door slides in front of a fixed panel. The internal frame is hand-built using extremely high-quality heartwood timber without knots, with a very tight ring formation and high tensile strength. This can be painted any colour or be naturally finished to highlight the beauty of the grain.

When the door is closed, all that you can see from outside is a seamless glass surface with a beautiful coloured border. The internal timber frame is sourced from the highest grade of Scots Pine. Grown in the Arctic, its quality is determined by extremely slow growth, coupled with ideal soil types. The raw material comes from well-managed, sustainable forests and can be painted almost any RAL colour or be naturally finished. 'Svarre' Single doors should only be installed as occasional doors, they should not be specified as front or main entrance doors.

uPVC Sliding Doors

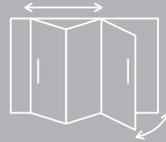

The KAT patio door system is widely regarded as the finest uPVC patio door solution available in the UK. We have been making uPVC patio doors since 1998 and you can be assured that our current product is market leading in terms of aesthetics, security, design and finishes.

These high-security, virtually maintenance-free doors are thermally enhanced, with multi-chamber profiles, exceptional weather seals and high specification energy efficient double glazing. KAT uPVC patio doors are around 30% less expensive than our equivalent aluminium product and represent amazing value for money.

uPVC Sliding Bifold Doors

KAT uPVC Bifolding doors are custom designed, with totally bespoke components, allowing us to provide an unparalleled, folding sliding door product of the highest specification.

Our KAT Bifolding door system was designed with built-in security, surpassing the standards of PAS24 and it was the first uPVC Bifolding door system to attain a British Kitemark.

uPVC Flush Casement Windows

Our Casement windows cater for a diverse range of properties, combining a slim appearance with the luxury of a fully mechanical outer frame for a truly authentic timber look, with a beautiful white woodgrain ovolo sculptured finish on the inside.

A dummy sash is fitted to any fixed windows, providing a balanced appearance and equal sight lines between your chosen configuration of fixed and opening windows. A wide range of colours, with Georgian bar detailing and a choice of elegant furniture is available.

uPVC Box Sash Windows

KAT sash windows authentically replicate beautiful Victorian and Edwardian period windows, meticulously combining technology and tradition. We offer you the ideal product; luxury windows perfect even in conservation areas. Hand-crafted by joiners using traditional craftsman's techniques, coupled with 100% recyclable uPVC frames and energy efficient glass, your windows will not require regular maintenance, nor will they ever warp, shrink, stick, or need painting.

Semi-commercial Doors & Facades

In our Stag Aluminium Kilmarnock factory, we design, manufacture and install commercial aluminium glazing solutions. We specialise in Kawneer, Metal Technology, Senior SAS and Smart Profile Systems.

Typical market sectors are:

- Education
- Retail
- Offices

Commercial Aluminium Products supplied are:

- Shopfronts
- Curtain wall and low rise screens
- Facades
- Automatic doors
- Commercial entrance doors
- Aluminium sliding and bifolding doors
- Glazed structures
- Windows
- Fire exit doors

A TOTAL QUALITY APPROACH

Throughout the manufacturing process and prior to despatching any door or window, KAT quality check every single product to ensure it meets our high standards. To back this up, every KAT product is covered by a 10 year guarantee.

KAT Windows & Doors are installed by a select network of UK installers. All enclosed photography is subject to third party copyright and must not be used outside of this brochure. In keeping with market trends and improvements we reserve the right to change specifications and hardware accordingly and without notice. Some fittings may therefore differ slightly from those on the images shown at the time of print.
