

Windows and Doors in uPVC and Aluminium

KRAFTSMAN FLUSH WINDOWS

The Kraftsman Flush Sash is a hand-crafted casement window which stands up to close scrutiny as an alternative to a traditional timber window.

When two side opening casements are adjacent, KAT's flush windows can feature a floating mullion. The mullion is attached to one casement, creating a desirable clear space when both are opened, especially for fire escape applications.

Additionally, choose even slimmer sightlines with the "Invisible Mullion", where the mullion cannot be seen externally when the window is closed.

Features:

- Suitable for conservation areas
- Mechanically jointed sash and frame to replicate timber
- Joints will withstand 4.3 kN of pressure (stronger than welded)
- Welded option available
- Lockable night vent facility
- Sculptured White Woodgrain Ovolo finish to the inside
- 5 colours from stock each with a textured woodgrain finish
- NEW Spectral luxury matt finish in Anthracite Grey
- 3 elegant handle designs in various finishes
- Excellent thermal performance - U-Value of 1.4 W/m²K
- 10 year guarantee

Alternative to Aluminium

The luxurious Spectral finish has a smooth matt feel, the perfect choice when aiming to replicate aluminium windows. Our Spectral finish is complemented by our fully welded outer frame and sash, combined with mechanically jointed transoms and mullions. If preferred, for a French window with two opening sashes side by-side, we can now manufacture a slimmer mullion which is invisible from the outside.

Security

High security locking system. Master door has 3 hook lock. Intermediate handle has a shootbolt.

Thermal Performance

High specification weather protection.

The VEKA UK Group

PTIO DOORS

We have been the leading trade supplier of uPVC patio doors across the UK and Ireland since 1998.

Our KAT uPVC patio door is subject to continuous development and we are proud to continue to lead the market. It is packed with safety and security features and is available in 2, 3 or 4 door configurations, opening from left or right, or from both ends.

More secure than French double doors, they offer light, space and flexibility without compromising where to put your furniture. Our standard threshold and low thresholds have been weather tested and our low threshold meets Part M Regulations.

Hardware & Accessories

Handles are available in White, Chrome, Satin, Gold, Grey and Black.

Security

High security locking system incorporating anti-lift blocks.

Thermal Performance

Quadruple interlock seals for great energy efficiency.

ALUMINIUM BIFOLD AND SLIDING PATIO DOORS

KAT's Aluminium Bifold Doors are perfect for creating an almost seamless transition between your home and garden.

Colours

Any RAL colour available in a Textura, Matt or Gloss finish
