

KRAFTSMAN FLUSH WINDOWS

The Kraftsman Flush Sash is a hand-crafted casement window which stands up to close scrutiny as an alternative to a traditional timber window.

When two side opening casements are adjacent, KAT's flush windows can feature a floating mullion. The mullion is attached to one casement, creating a desirable clear space when both are opened, especially for fire escape applications.

Additionally, choose even slimmer sightlines with the "Invisible Mullion", where the mullion cannot be seen externally when the window is closed.

Features:

- Mechanically jointed sash and frame to replicate timber
- Excellent thermal performance – U-Value of 1.4 W/m²K
- 10 year guarantee
- Suitable for conservation areas
- Lockable night vent facility
- Sculptured Ovolo finish to the inside
- Three elegant handle designs in various finishes
- Welded option available

Our fully welded outer frame and sash is combined with mechanically jointed transoms and mullions.

For a French window with two opening sashes side-by-side, we can now manufacture a slimmer mullion which is invisible from the outside.

Security

Each window will feature a multi-point locking system, securing all four sides of the opening sash, for your safety and security.

Locking mechanism securing all four sides of the opening sash.

Colours

The Craftsman Flush Sash is also available in a wide range of colours and woodgrain finishes.

Now available in solid grey base profile.

Whitegrain on Whitegrain

Cream on Whitegrain
